# Opportunities Illustrated in the Great Pyramid

6

Br. Harry Wildblood

Down to Earth!

➔ The little circles at the bottom are people, to show how enormous the pyramid really is.

The title of this talk is...

➔ "Opportunities Illustrated in the Great Pyramid."

References are Volume 3 pages 309-376 and Great Pyramid Passages Vol 1 pages 79-122.

➔ We want to answer three basic Questions:

What are these opportunities?

How are they shown?

Do they compare with the scriptures?

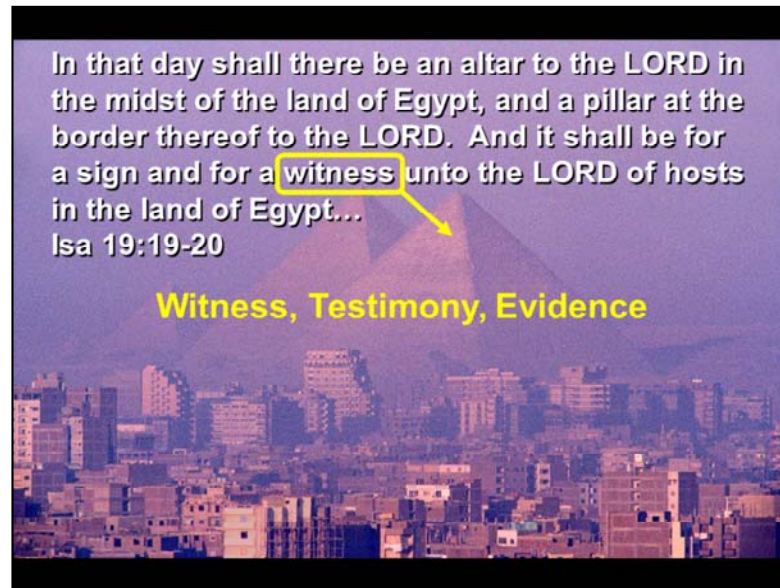

So, what exactly is an opportunity?

It's a suitable time, place and circumstances favorable for a desired end or purpose.

An opportunity enables you to do something you couldn't do otherwise.

➔ Let's see what the great pyramid says about opportunities,

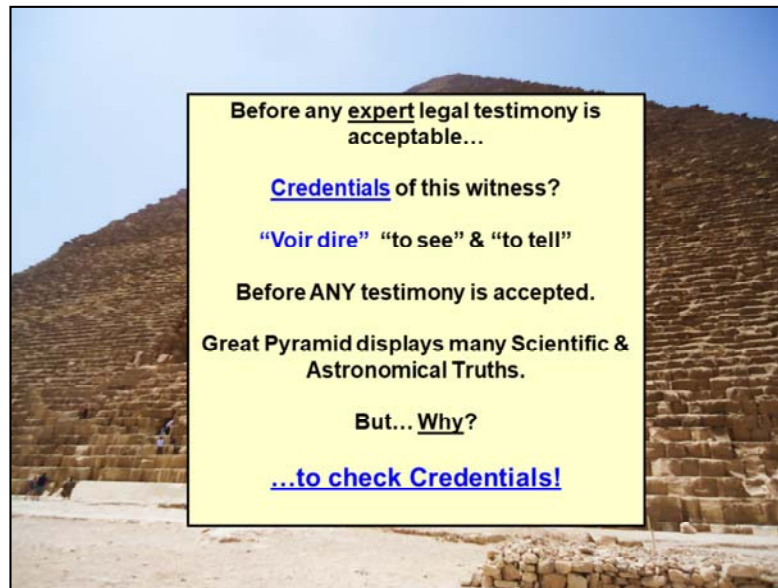

But first, we'll look at the scriptures... ➔

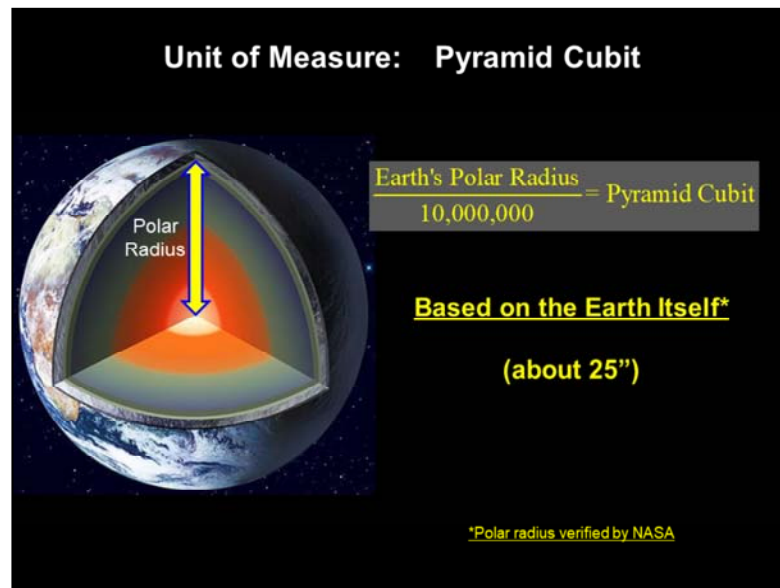

Isaiah 19:19-20 says: In that day shall there be an altar to the Lord in the midst of the land of Egypt and a pillar at the border thereof to the Lord and it shall be for a sign and for a

→ **witness** unto the Lord of hosts in the land of Egypt.

→ A witness is someone that gives testimony and evidence. This enormous pyramid is considered by God to **be** this witness. Let's see what makes a witness acceptable? →

- ➔ Before any expert legal testimony is acceptable,
- ➔ the credentials of the witness must be verified.
- ➔ this is referred to as "voir dire" [vwah deer] the witness, which is French for "to see" and "to tell,"
- ➔ in other words, before any testimony is accepted there must be proof that the witness is an expert and has relevant testimony on the subject at hand.
- ➔ The great pyramid displays many scientific and astronomical truths.
- ➔ But, why? ...These truths... like the distance to the sun, the size of the earth... are already well known by man, so why include them? The answer is:
- ➔ to check the credentials of the great pyramid as God's witness to mankind.
- ➔ So, let's begin ... ➔

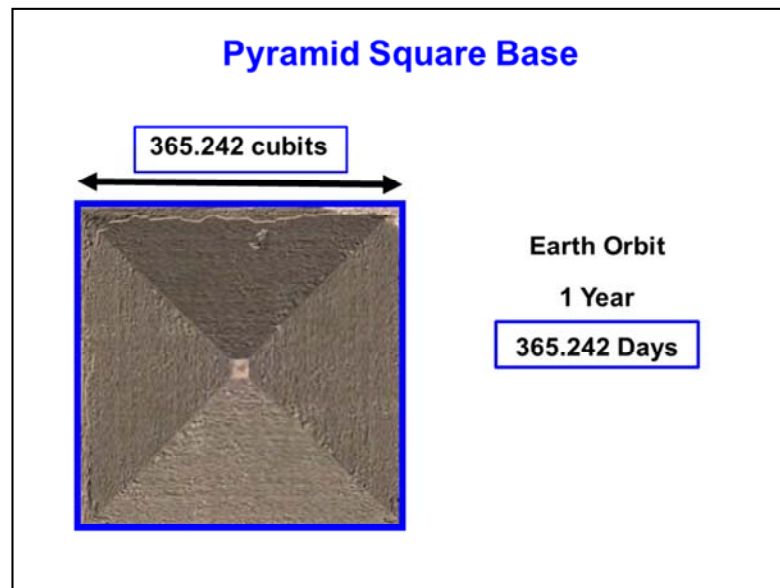

The unit of measure in the Great Pyramid is the Pyramid cubit, based on the earth's polar radius

➔ ...from the core to the north pole, then divided by 10 million.

➔ This cubit is based on the earth itself... and requires a precise understanding of the earth's dimensions.

➔ It's about 25 inches long. Now let's look at the pyramid... ➔

Most of you know that the pyramid has a

→ square base. Each side measures exactly

→ 365.242 cubits.

→ It so happens that the earth orbits the sun in exactly 365.242 days. Again, this shows that the designer of the pyramid had an intimate understanding of planet earth. →

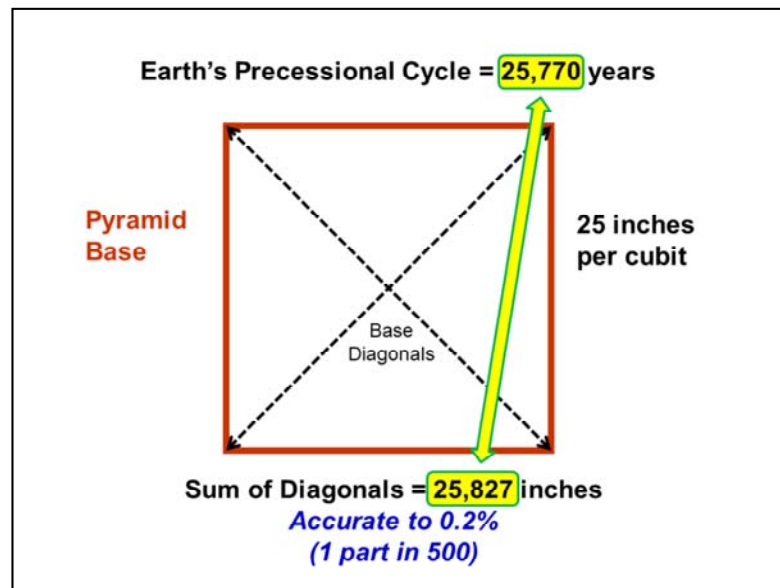

Next... The earth precesses on its axis about every 26,000 years. to demonstrate precession,

➔ here is a video of a small top slowly precessing as it spins very rapidly.

➔ The earth does the same thing... except it takes about 26,000 years for its precessional cycle.

➔ The earth's axis points at the north star now, but this will change as the precession continues

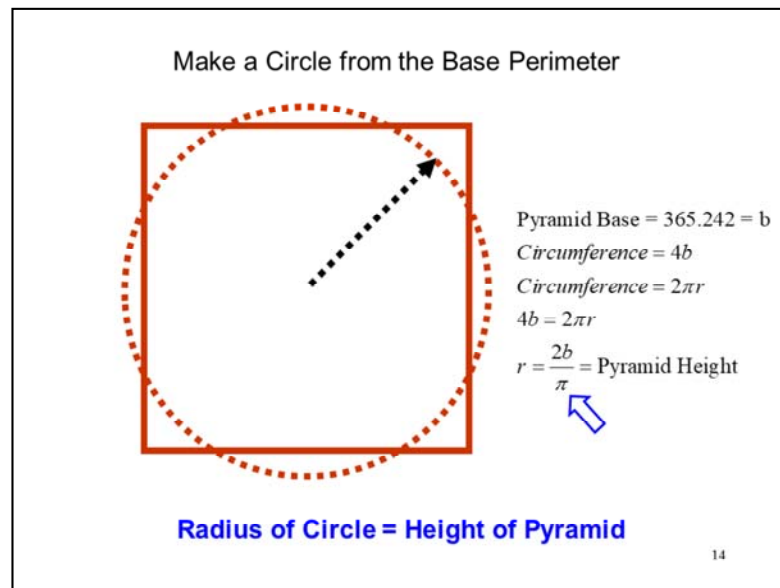

➔

Man's best estimate of earth's precessional cycle is 25,770 years.

- ➔ The sum of the diagonals of the base add up to 25,827 pyramid inches at 25 inches per cubit.
- ➔ This is accurate to one part in 500. Again, the pyramid's design shows a tremendous knowledge of planet earth. And... notice that the length of the diagonals is already fixed by the pyramid's square base.

➔

If we take the perimeter of the square base

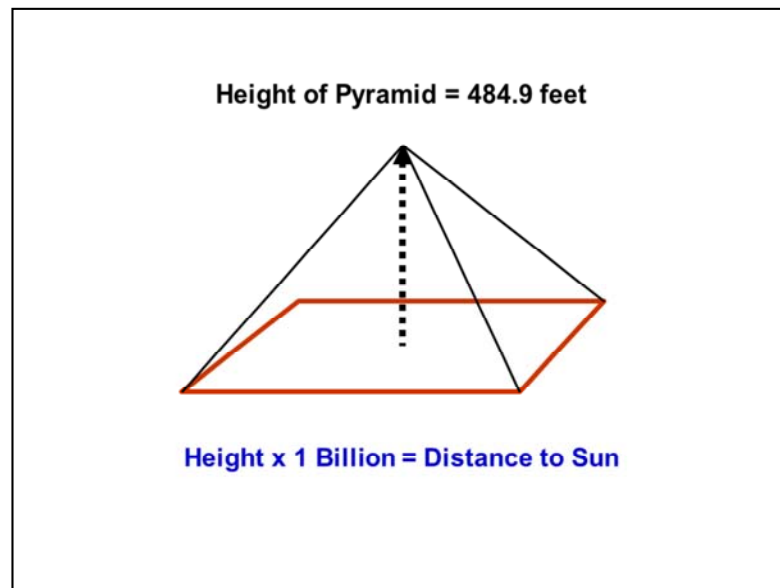

→ and make a circle with the same perimeter,

→ the radius of that circle is the exact height of the pyramid.

→ This means that the value of

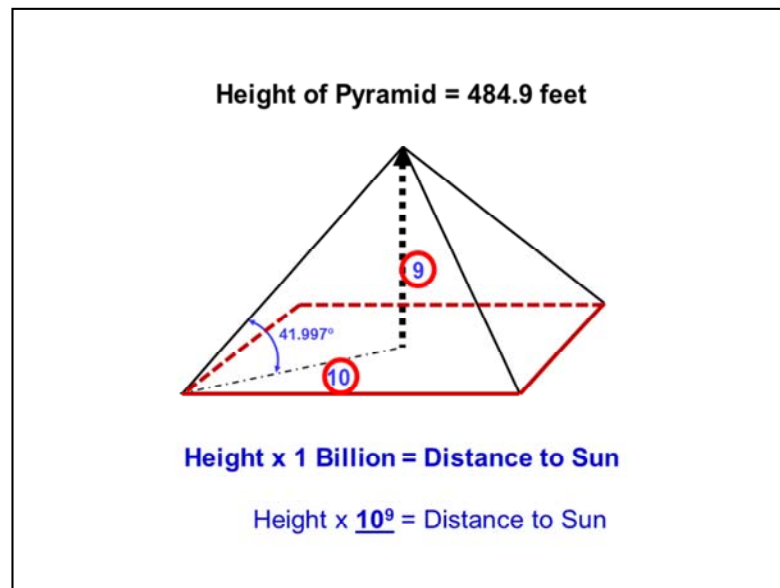

→ Pi is designed into the pyramid, and the pyramid's height is also pre-determined and fixed.

→

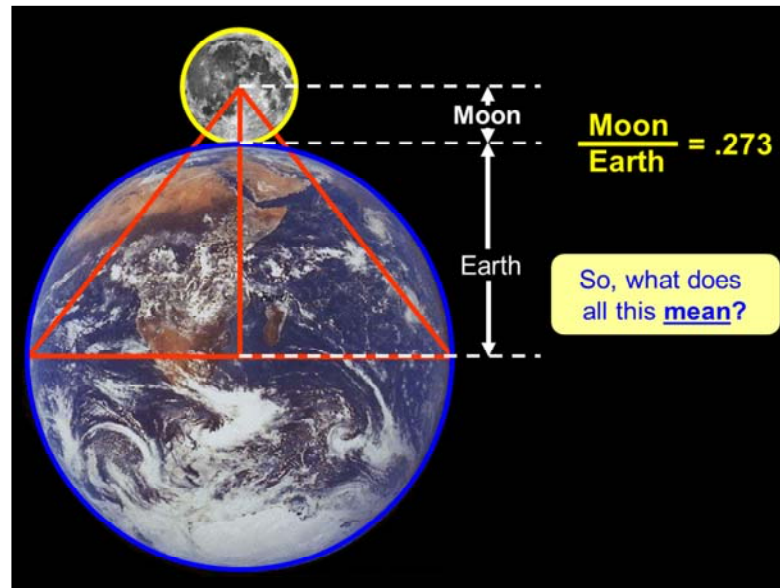

the pyramid is 484.9 feet high.

➔ If we multiply its height by 1 billion this is the distance to the sun. ➔

In other words... take the height of the pyramid and multiply it by 10 to the 9th power. The great pyramid itself, tells us to do this by its...

→ corner angle which is a ratio of 10 to 9. →

Finally, if we make the pyramid's base

- ➔ the diameter of a circle, and then make the part left over at the top
- ➔ the radius of another circle,
- ➔ these two circles will have the exact ratio of the
- ➔ moon to the ➔ earth... 0.273
- ➔ So, what does all this mean? ➔

**“Over-Determined System”**

One Base Length Determines:

1. Length of Year
2. Precessional Cycle
3. Distance to Sun
4. Earth-Moon Ratio

**Impossible!...**

**Unless...** the **earth**, **sun**, **moon** and **stars** were **Designed** to **fit** these features of the Great Pyramid.

**WHO** could do this?

**Only GOD Himself!**

The Pyramid is what engineers call an “overdetermined system.” The pyramid’s base length determines four independent physical features of the solar system

1. the length of the year
2. precessional cycle
3. distance to the sun
4. and the earth moon ratio

➔ This would be IMPOSSIBLE to do...

➔ Unless ...

➔ the **earth**, **sun**, **moon** and **stars** were **designed** to **fit** these features of the Great Pyramid.

➔ But who could do this?

➔ Only God himself!

Br. Harry Wildblood

So when we look at our earth, realize that the earth...

→ the sun,

→ the moon,

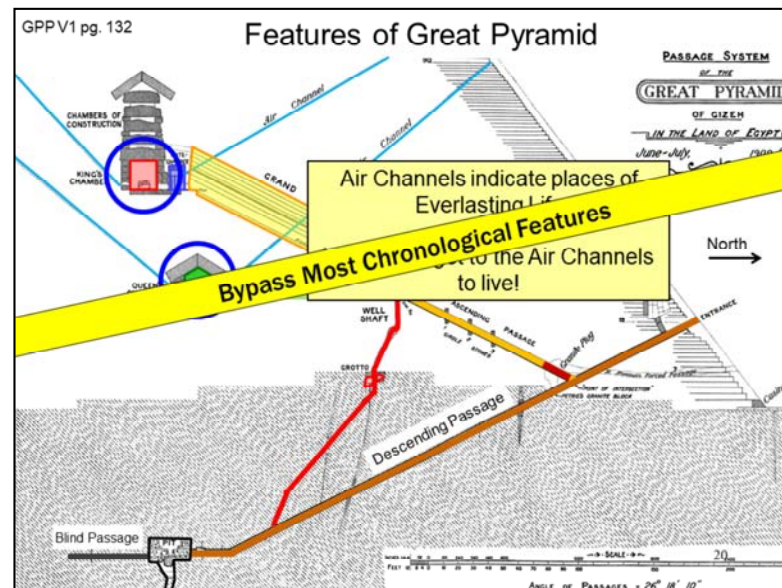

→ and even the stars, were all designed by God for these lessons.

→ Psalm 121:2, "My help cometh from the LORD, which MADE heaven and earth. In volume 3, Brother Russell tells us that God is...

→ "the great architect of the universe." Isaiah 46:10 tells us that God declares the end from the beginning. That is exactly what both the scriptures AND the Great Pyramid do.

→ the Credentials of this Witness are firmly established. Now, Let's

→ HEAR the testimony of this witness. →

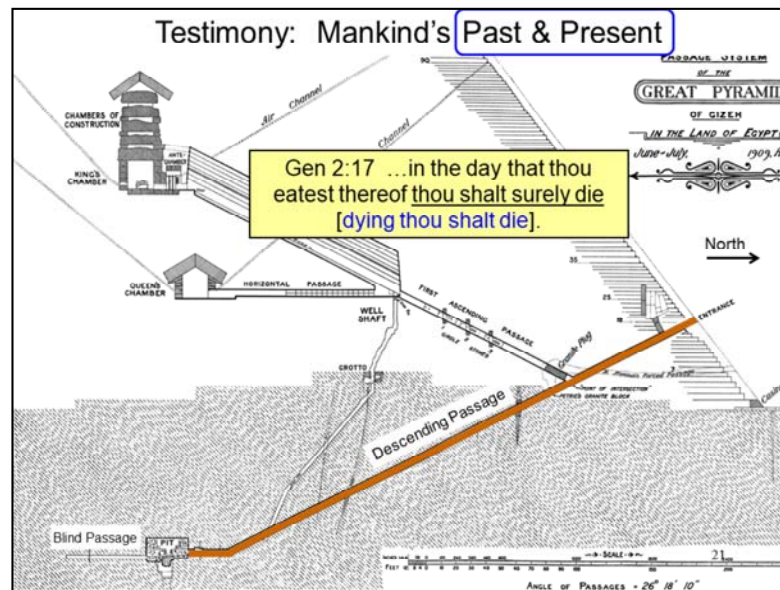

The main features of the great pyramid are:

- ➔ the descending passage,
- ➔ the pit,
- ➔ the blind passage,
- ➔ the first ascending passage
- ➔ the granite plug,
- ➔ the horizontal passage,
- ➔ the Queen's chamber,
- ➔ the grand gallery,
- ➔ the ante-chamber,
- ➔ the King's chamber
- ➔ the well shaft
- ➔ the grotto, And finally
- ➔ the air channels.

These names were given by Egyptologists and are not in the Bible. First, we want to see that...

- ➔ the Air Channels indicate places
- ➔ of Everlasting Life... If you were hermetically sealed in the great pyramid...
- ➔ You MUST get to the Air Channels to live! Note:
- ➔ We will bypass most of the Pyramid's chronological features in our lesson today. ➔

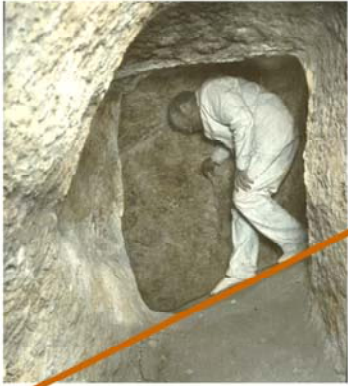

The first testimony is mankind's past and present. When Adam sinned God pronounced...

→ "thou shalt surely die, or, dying thou shalt die" This is shown in...

→ the descending passage which is over 300 feet long... It pictures where the majority of mankind are born, live and die →

Descending Passage - Dying Thou Shalt Die

- Descending Passage
- About 4 feet high
- Very steep 48% grade
- Fall of Mankind
- Bent over, looking down
- Opportunity?
  - Short life followed by death
- Plane R on the Chart

The descending passage is about four feet high.

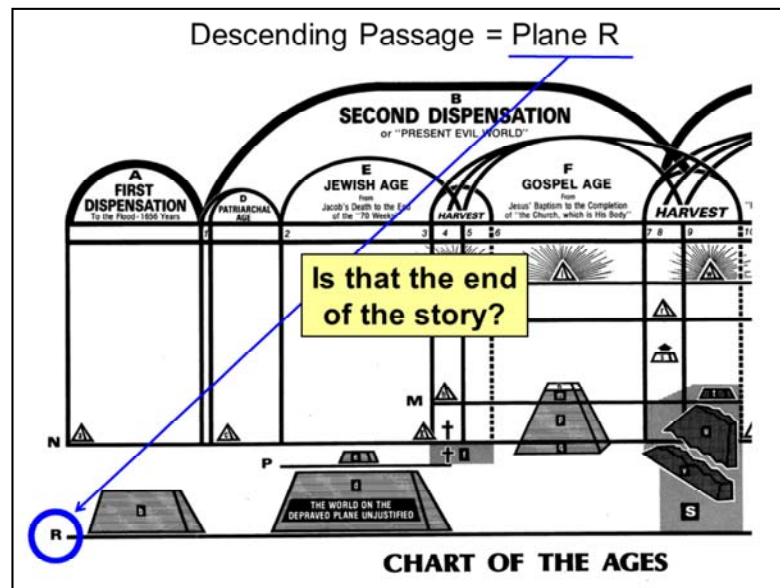

➔ It's very steep with a 48 percent grade. ...much steeper than any road built today. It illustrates the

➔ Fall of mankind. One must be **bent over...** **looking down** to walk this passage.

➔ What opportunity is shown here?

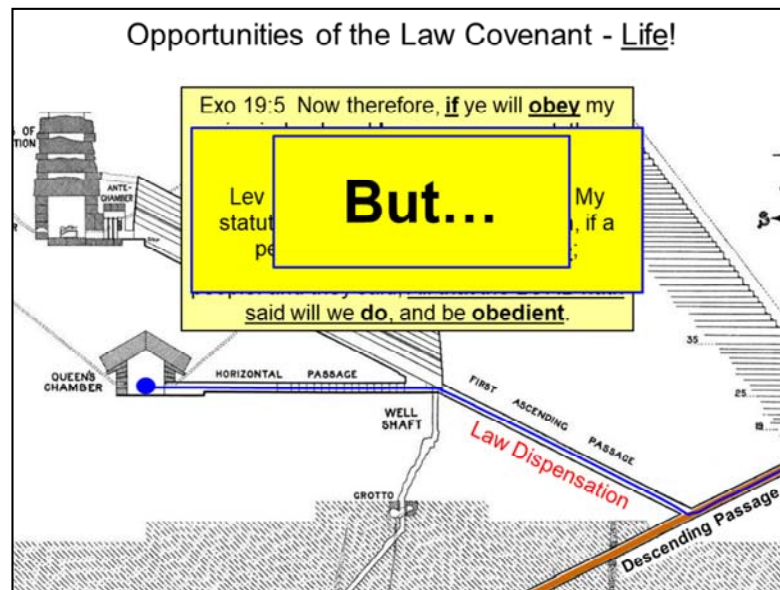

➔ a short life... followed by death.

➔ This is shown as Plane R on the Chart of the Ages. ➔

Plane R shows the depraved world of mankind, condemned to death.

➔ But is that the end of the story? ➔

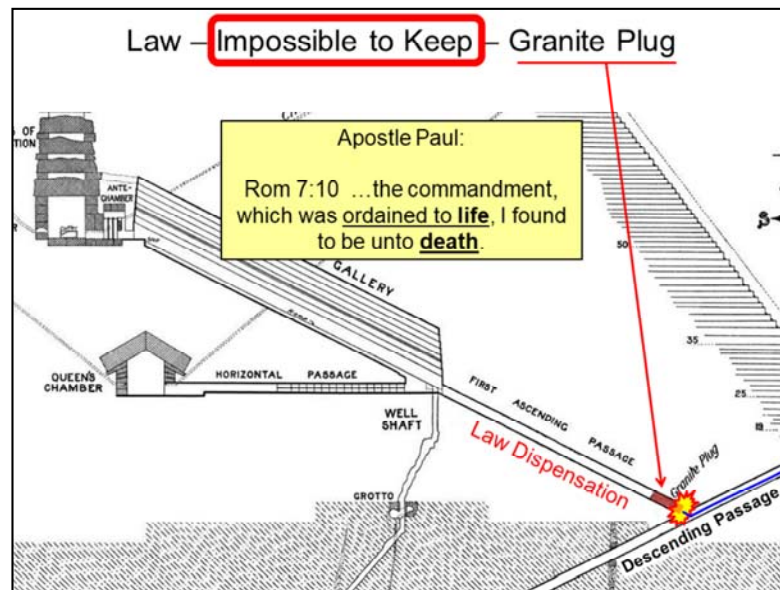

After God freed Israel from Egypt, he brought them to Mount Sinai and proposed a covenant, based on His Law. He said ...

- ➔ if you will obey my voice and keep my covenant, then you shall be a peculiar treasure unto me above all people. In Exodus 24 the law was read, and all the people replied, "all that the Lord has said we will do and be obedient." This established
- ➔ the Law Dispensation, shown by the First Ascending Passage.
- ➔ It sounded wonderful. Just keep God's laws and receive everlasting life. After all, Lev 18:5 says: "you shall keep My statutes and My judgments, by which, if a person keeps them, he shall live;" They could now leave this descending passage...
- ➔ and go right up to the Queen's chamber to everlasting life!
- ➔ **But...**

Br. Harry Wildblood

The Law was impossible to keep.

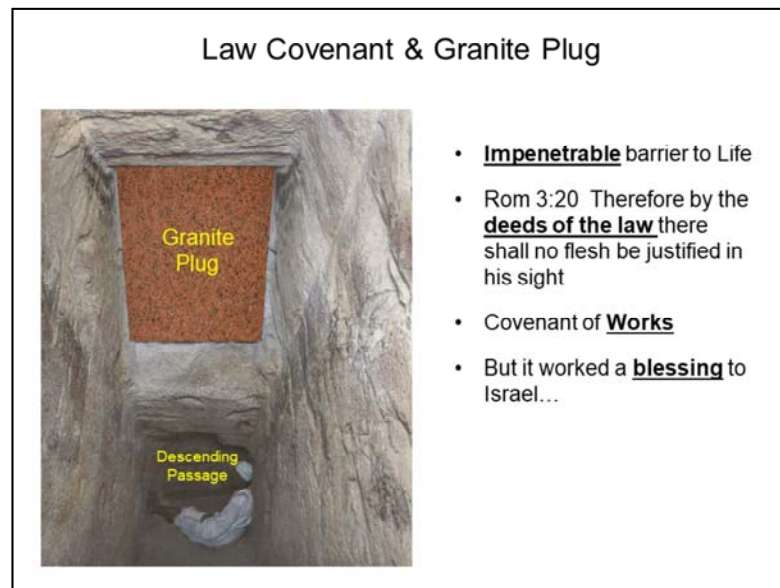

➔ Shown by the Granite Plug. Paul realized,

➔ “the commandment which was ordained to Life, I found to be unto Death.”

Israel, thought they could get life by simply obeying...

➔ But... they ran into the Granite Plug, the Diving Law. ➔

This granite Plug, is an impenetrable barrier to the first ascending passage. Just as God's perfect Law is an impenetrable barrier to life for fallen man. Paul tells us

→ "by the deeds of the Law, shall no flesh be justified." Because the Law Covenant was

→ a covenant of works, perfect works, which no fallen man could do.

→ But it was a blessing to Israel... →

Law Covenant & Dispensation

- Mediated Covenant
- Israel reckoned in First Ascending Passage
- Typical Sacrifices
- 4 ft ceiling, 48% grade
- Still bent over, but looking UP
- Care, protection, guidance, chastisements
- But all still died...
- God's Law – Schoolmaster – prepare them for Messiah
- Plane P on Chart

This was a mediated covenant.

They were reckoned as keeping it through the Typical sacrifices.

This is shown in the First Ascending Passage in a

→ steep climb above the rest of the world.

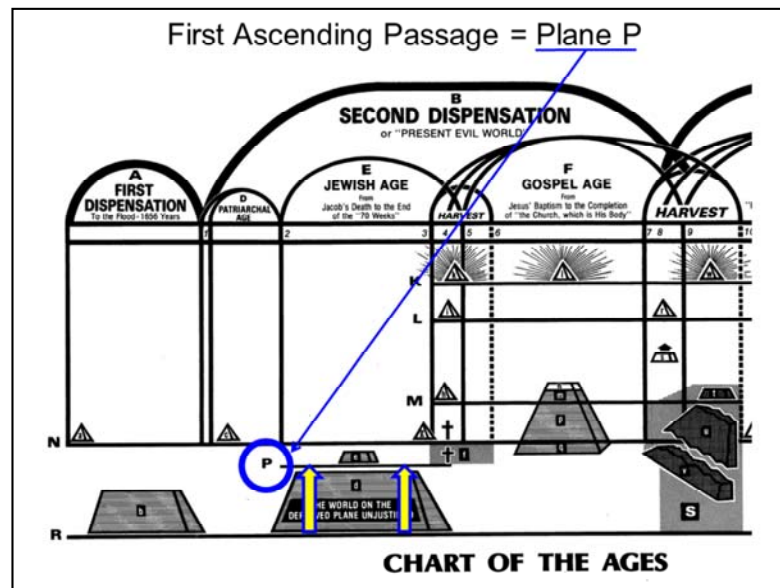

The ceiling was low, but the traveler would be looking UP not Down.

They received God's care, protection, guidance, **and** chastisements.

But... all still died.

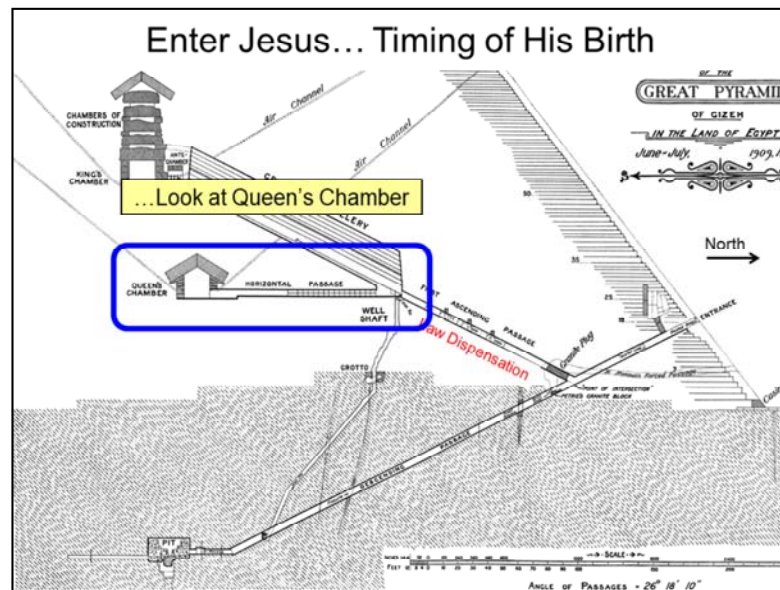

God's law **blessed** them as righteous schoolmaster to prepare them to Recognize their Messiah.

→ They were Pictured on Plane P on the Chart. →

The Plane P of typical justification.

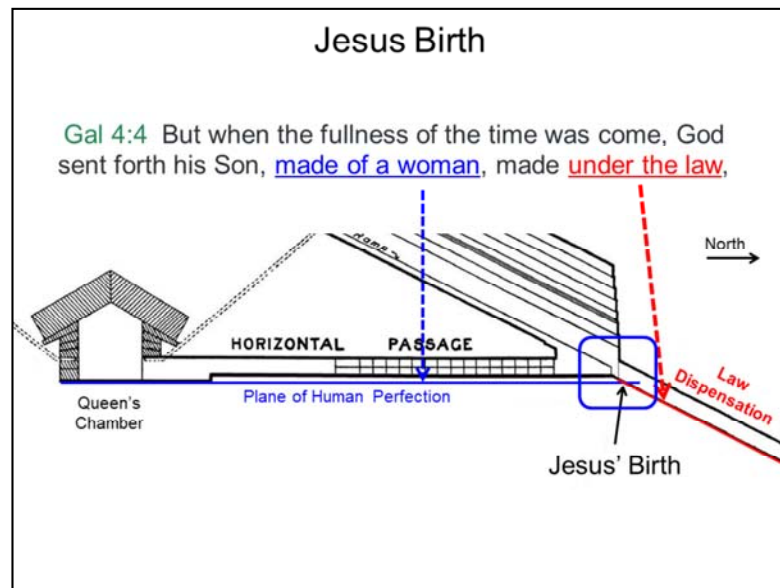

→ Higher than the depraved world of mankind. →

During the Law Dispensation, Jesus was born.

To understand the timing of his birth,

→ Let's look at the Queen's Chamber

The Queens' Chamber floor...

→ illustrates the Plane of Human Perfection.

The floor of the

→ First Ascending Passage shows the duration of the Law Dispensation.

Paul tells us: in

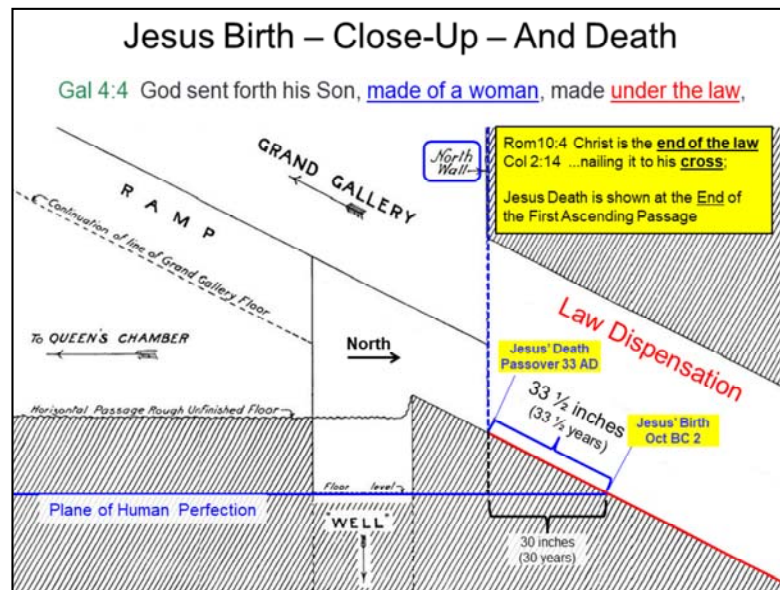

→ Galatians 4:4 "But when the fullness of the time was come, God sent forth his Son, made of a woman, made under the law," Jesus was born perfect

→ pictured on this plane. He was also

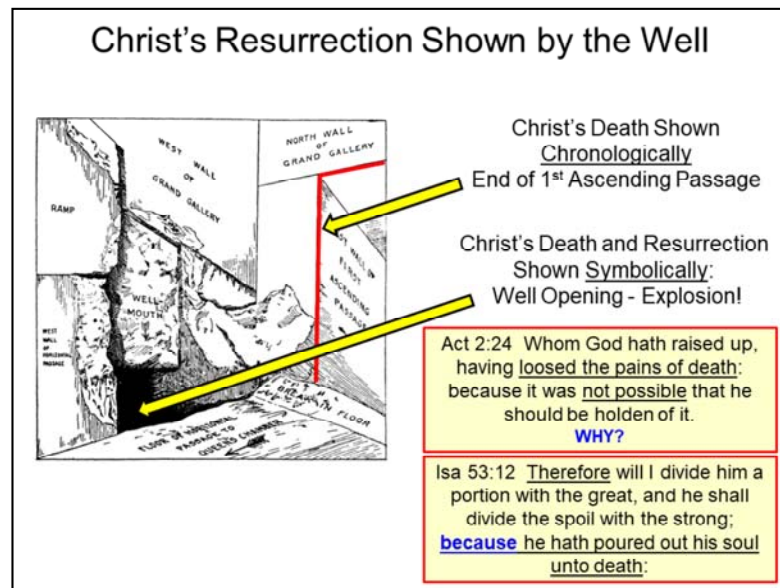

→ under the Law pictured in the First Ascending Passage.

→ Jesus' birth is where these intersect.

→ Let's look at a close-up at this...

- ➔ If we extend the Plane of Human Perfection North to the floor of the First Descending Passage, it indicates the
- ➔ point of Jesus' Birth in Oct. BC 2. Paul tells us that the Law dispensation ended at Jesus' Death
- ➔ Rom10:4 Christ is the end of the law  
Col 2:14 ...nailing it to his cross;
- ➔ Jesus Death is shown at the End of the First Ascending Passage at Passover BC 33.
- ➔ This is exactly 33 1/2 inches up the First ascending Passage, showing the 33 1/2 years of Jesus' life
- ➔ The 30- inch base of this triangle shows Jesus' 30 years of perfect humanity before spirit begettal
- ➔ Jesus' death is also shown by the North wall of the Grand Gallery.

The Well opening in the Grand Gallery floor shows Jesus' resurrection.

→ Christ's Death is Shown Chronologically at the End of 1<sup>st</sup> Ascending Passage

→ Death and Resurrection are Shown Symbolically by the well opening, which looks like an Explosion!

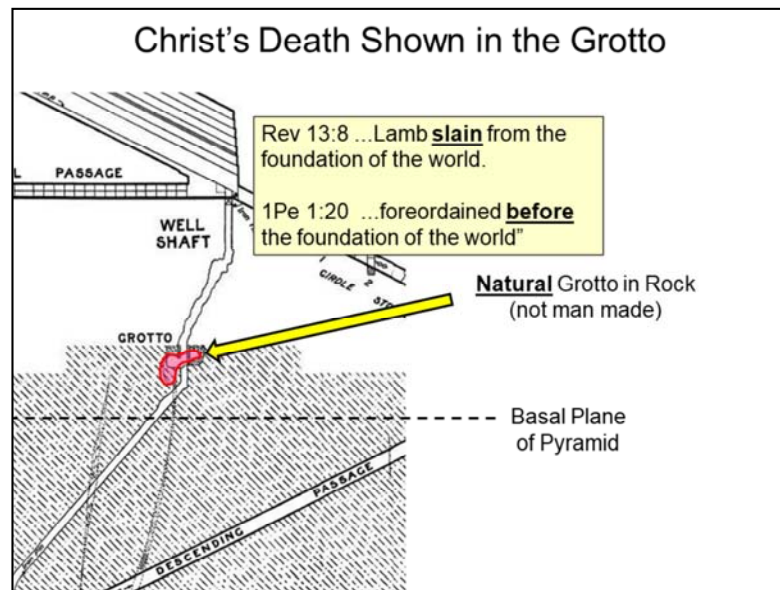

→ Act 2:24 God raised him up, having loosed the pains of death: because it was not possible that he should be holden of it.

**WHY?**

→ Because he had faithfully completed his portion of the sin offering

Isa 53:12 ...I divide him a portion with the great, and he shall divide the spoil with the strong; **because** he hath poured out his soul unto death: →

Christ's Death is also shown in the Grotto – a NATURAL formation in the bedrock, not man made.

➔ Showing that the Ransom was the Key part of God's plan from the foundation of the world and foreordained before the foundation of the world. ➔

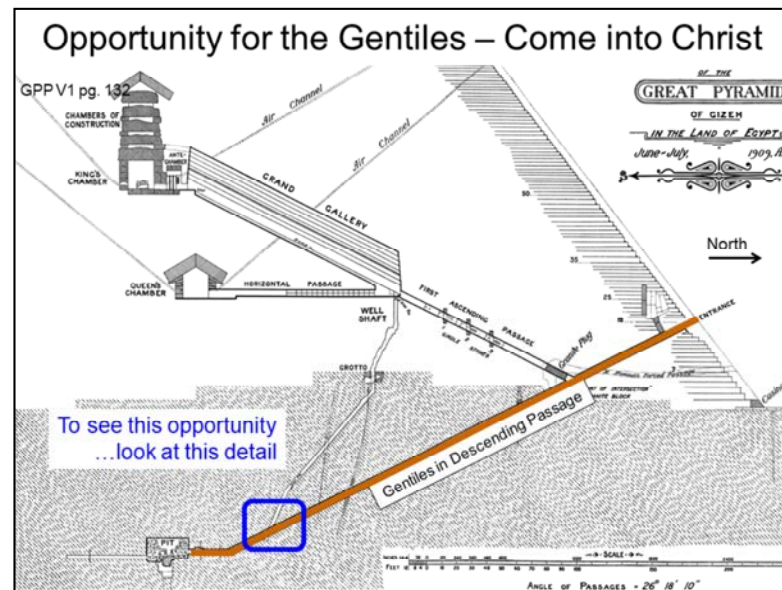

Natura Grotto – a NATURAL formation in the bedrock, not man made.

Two brethren looking at the...

→ “Lamb’s Head” formation

→ Compare with Actual Lamb’s head

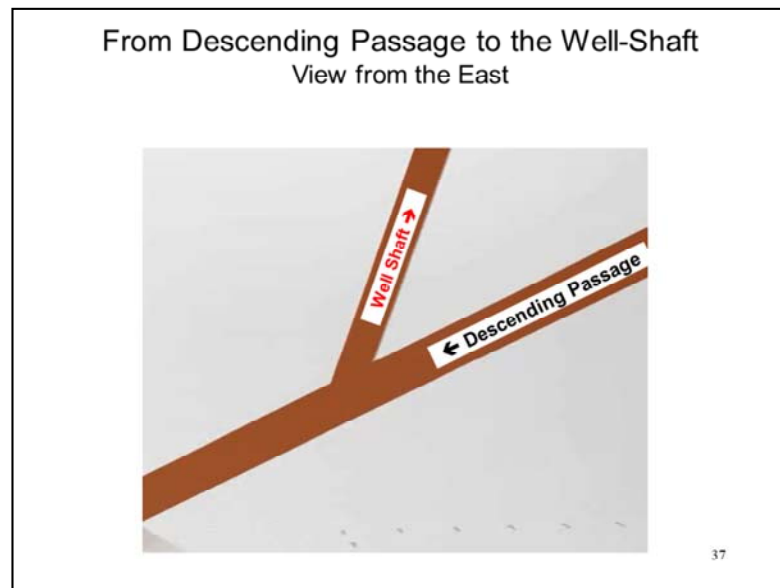

For now, we'll bypass Israel and look at the Opportunity for the Gentiles to Come into Christ.

→ To see this opportunity ...look at this detail →

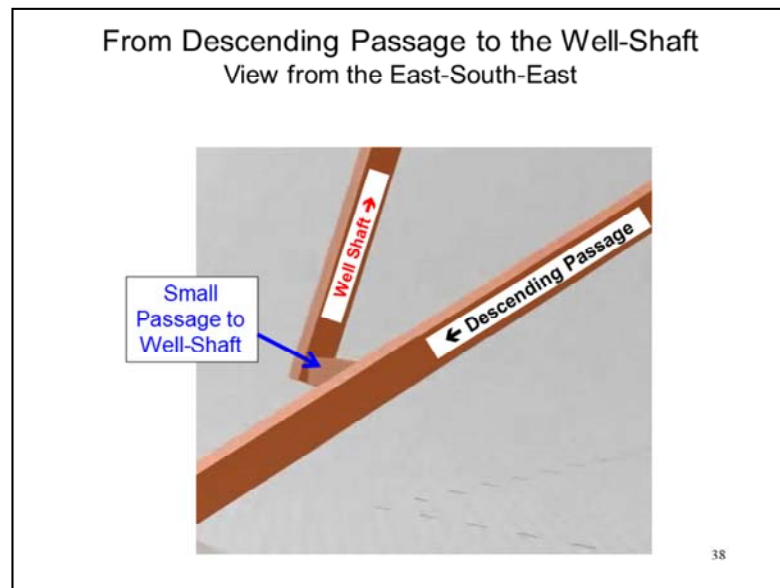

Here is a closeup of the ➔ Descending Passage and the ➔ Well Shaft.

➔ We want to focus on this small passage to the Well-Shaft. ➔

This is a 2D drawing of these features.

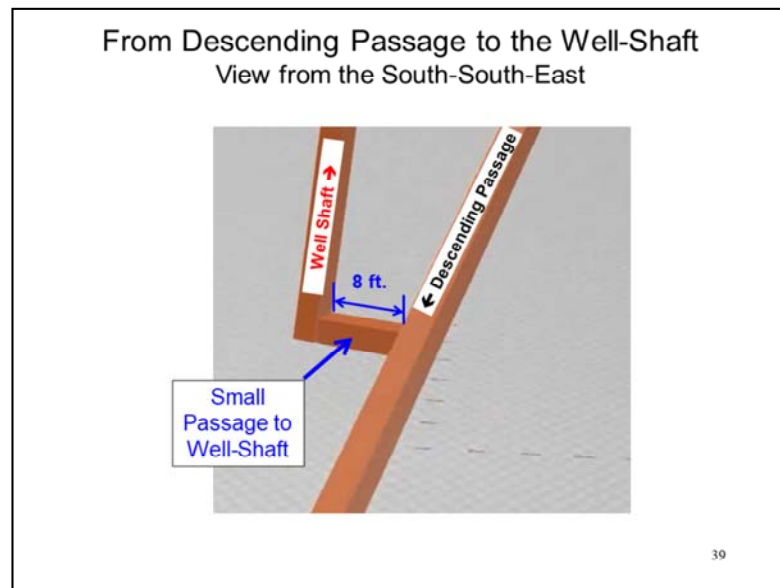

Now we'll move around in 3D to see how these are connected...➡

There is a

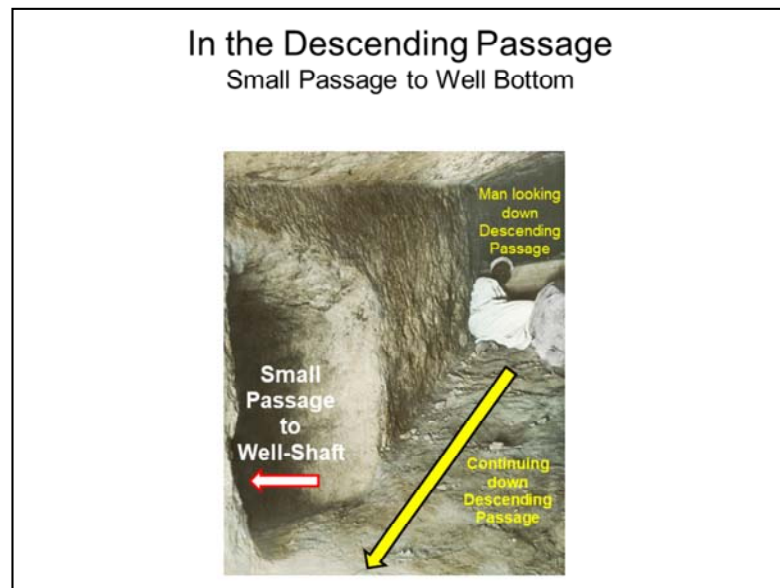

➔ Small Passage **from** the Descending Passage **to** the Well-shaft

Let's get an even better view of this... ➔

This Small Passage to the Well Shaft

→ is about 8 feet long. →

Here is a man looking down the Descending Passage. On his right

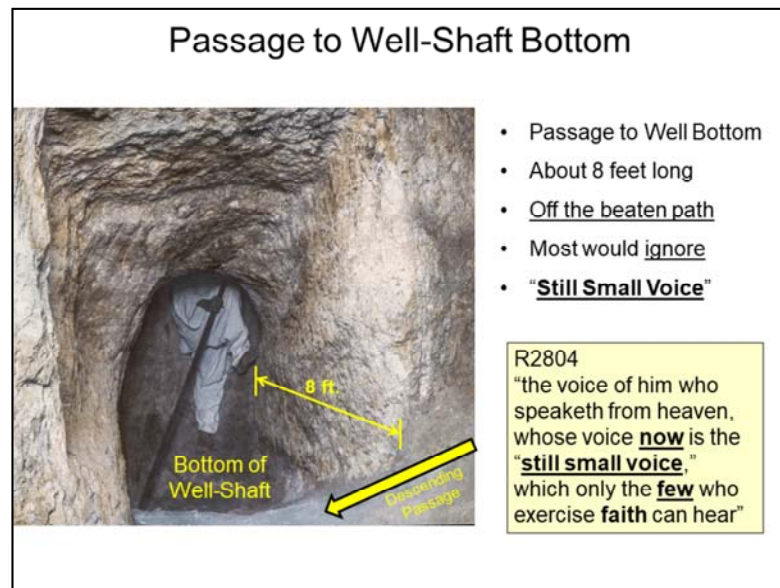

➔ is the Small passage to the to the Well Shaft. ➔

In the Descending Passage  
Smaller than Descending Passage

Notice that it's quite a bit **smaller** than the Descending Passage

This Passage to the Well Shaft is about 8 feet long... and **off** the Beaten Path

Its **smaller** and **harder** to enter

Most would ignore this small side-track

This seems to represent

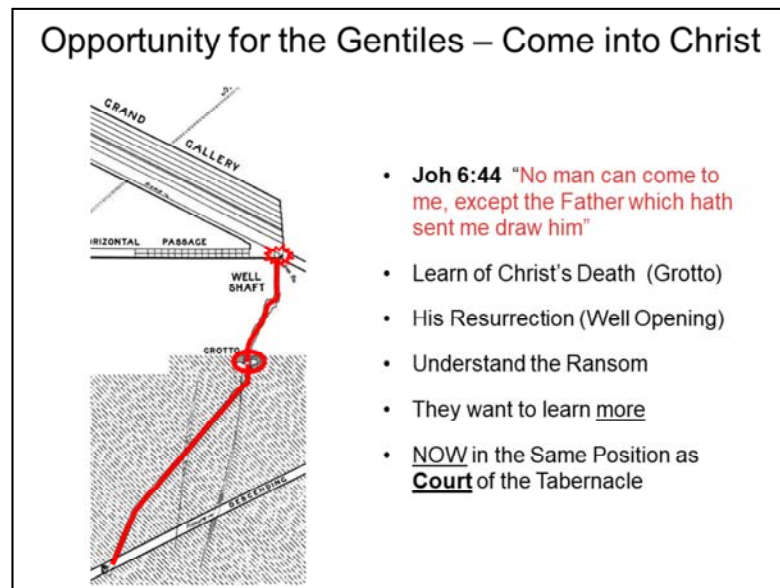

→ the **Still Small Voice** of truth

R2804

"the voice of him who speaketh from heaven, whose voice **now** is the **"still small voice,"** which only the **few** who exercise **faith** can hear"

All of the spirit-begotten have heard this voice and followed it...

...But these are VERY few compared to the rest of Mankind →

These are drawn by the Father...

**Joh 6:44** "No man can come to me, except the Father, which hath sent me, draw him"

They...

- ➔ Learn of Christ's Death (shown by Grotto)
- ➔ His Resurrection (shown by the Well Opening)
- ➔ They understand the Ransom
- ➔ And now they want to learn more of Christ and God's Plan
- ➔ They are NOW in the Same Position as Court of the Tabernacle

### Grand Gallery – Court of Tabernacle

- Polished White Walls, floor, roof
  - Justification
  - Like the White Curtain in the Court
- Must Climb! – steep 48% grade
- Ramps/railings & hand-holds
- Overcome Opposition

The Grand gallery with its polished White Walls, represents the Condition of Justification, like the Court with its White Curtain.

One must climb... up the steep grade, but...

➔ the Ramps and hand-holds keep the traveler from falling... They overcome opposition, with the Lord's help, all the way, as they gradually reach the top

➔

**White Walls:** John Greaves – English Mathematician  
Pyramidographia - 1646

90 *A description of the*  
and second Galleries, by which we ascend, all of  
them lying as it were in the face of a continued line,  
and leading to the middle of the Pyramid, we may  
easily apprehend a reason of that strange Echo  
within, of four, or five voices, mentioned by  
*Plutarch in his fourth book, De placitis Philosophorum*: or rather of a long continued passage, as  
found by experience, discharging a musket at  
the entrance. For the sound being first in, and  
carried in those close, and smooth passages, like  
as in so many pipes, or trunks, finding no other  
our reflects upon it selfe, and causes a confused  
noise, and circulation of the aire, which by degrees  
vanishes, as the motion of it ceases. This  
Gallery, or Corridor (or whatsoever else I may  
call it) is built of white, and polished marble, the  
which is very evenly cut in spacious squares, or  
tables. Of such materials as is the pavement,  
such is the roof, and such are the side walls, that  
flank it: the coagmentation, or knitting of the  
joins, is so close, that they are scarce discernable  
by a curious eye, & that which adds grace to the  
whole structure, though it makes the passage the  
more slippery, & difficult, is the activity & rising  
of the stone. The height of this Gallery is 26 feet,  
the breadth is 6 feet, and 870 parts of the foot di-  
vided into a 1000, of which three feet, and 435  
of 1000 parts of a foot, are to be allowed for the  
way, in the middle: which is set, and bounded on  
both sides with two banes (like benches) of black  
and polished stone, each of these hath one foot,  
717 of 1000 parts of a foot in breadth, and as  
much in depth. Upon the top of these benches  
near the Angle, where they close, and join with  
the

Same Lesson as  
the **White Curtain**  
in the **Court**

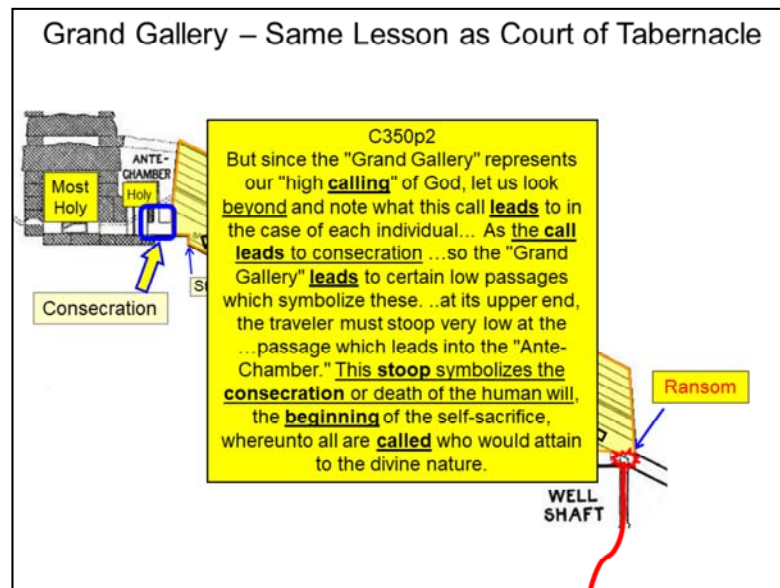

C348 – “This **gallery**, or corridor (or  
whatsoever else I may call it) is built of **white  
and polished marble [limestone]**, the which is  
very evenly cut in spacious squares or tables.  
Of such materials as is the **pavement**, such is  
the **roof**, and such are the **side walls** that  
flank it; the knitting of the joints is so close that  
they are scarce discernible to a curious eye;  
and that which **adds grace to the whole  
structure**”

Br Russell quotes John Greave's Book, Pyramidographia. Written in 1646 when the Grand Gallery was in a more pristine condition

→ He was struck by these polished White walls

→ ... on C348 Br Russell quotes... “This **gallery**, or corridor (or whatsoever else I may call it) is built of **white and polished marble [limestone]**, including the **pavement**, **roof**, and **side walls** ... which **adds grace to the whole structure**”

→ The **White Walls** give the same Lesson as the **White Curtain** in the **Court** →

The Ransom is pictured at the bottom of the Grand Gallery. Just like the Brazen Altar is the first thing

→ in the Court. From here, one must climb up to a higher level using the hand-holds.

→ → → → →

Just as one must wash at the Laver in the Court before reaching the first veil.

This climb is to approach Consecration which is pictured at the top,

→ above the step.

After Consecration,

→ one is in the Ante-Chamber - and the Holy of the Tabernacle.

When faithful unto death...

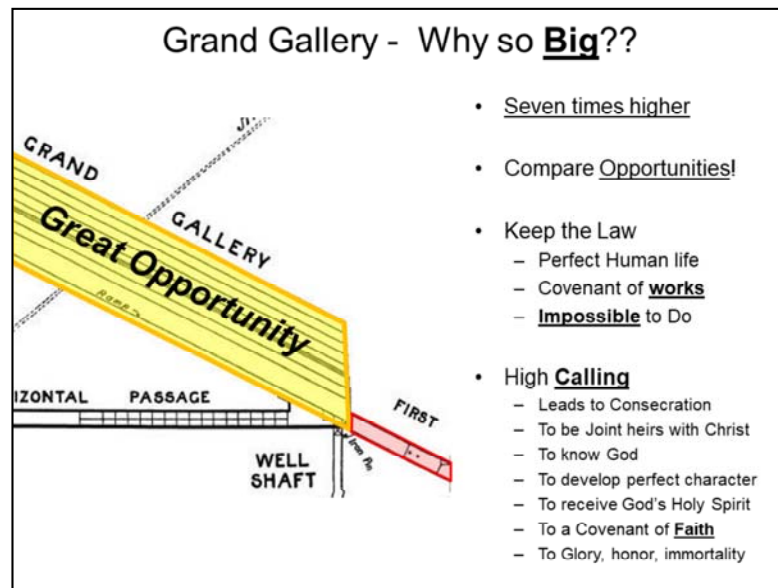

→ one passes to the King's Chamber - and the Most Holy

Br Russell's explains the Grand gallery in Volume 3 page 350 paragraph 2

→ "But since the "Grand Gallery" represents our "high calling" of God, let us look beyond and note what this call leads to in the case of each individual... As the call leads to consecration ...so the "Grand Gallery" leads to certain low passages which symbolize these. ...at its upper

end, the traveler must stoop very low at the ...passage which leads into the "Ante-Chamber." This **stoop** symbolizes the **consecration** or death of the human will, the **beginning** of the self-sacrifice, whereunto all are **called** who would attain to the divine nature."

But... why is the Grand Gallery so Big?

It's seven times higher than the first ascending Passage

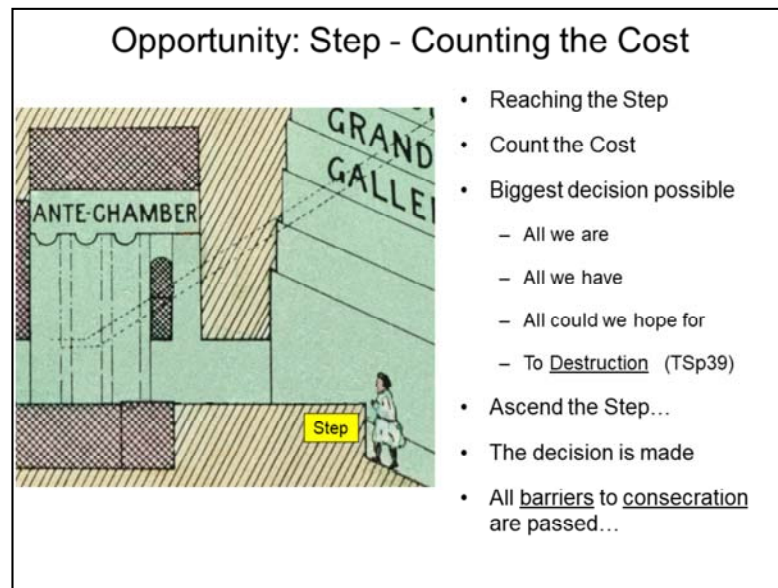

Well... just compare the opportunities...

Keep the Law and receive Human life, but...

It's a covenant of works which are impossible for fallen Man

→ The High Calling – is the Great Opportunity which

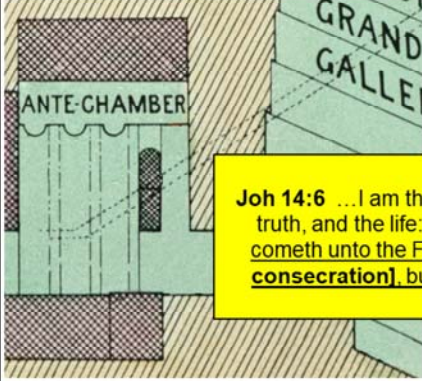

- Leads to Consecration
- To be Joint heirs with Christ
- To know God
- To develop perfect character
- To receive God's Holy Spirit
- To a Covenant of Faith
- To Glory, honor & immortality

We reach the Step at the Limit of the Grand Gallery floor, where we Count the Cost of consecration

## Opportunities Illustrated by the Great Pyramid

1. What are they?
2. How are they shown in the Pyramid?
3. Do they compare with Scriptures?

# What is an Opportunity?

**Suitable time, place  
and circumstances favorable  
for a desired end or purpose.**

**Let's see what the Great Pyramid  
says about Opportunities...**

In that day shall there be an altar to the LORD in the midst of the land of Egypt, and a pillar at the border thereof to the LORD. And it shall be for a sign and for a witness unto the LORD of hosts in the land of Egypt...

### *A description of the*

and second Galleries, by which we ascend, all of them lying as it were in the same continued line, and leading to the middle of the Pyramid, we may easily apprehend a reason of that strange Echo within, of foure, or five voices, mentioned by *Plutarch in his fourth book De placitis Philosophorum*: or rather of a long continued sound, as I found by experience, discharging a musket at the entrance. For the sound being shut in, and carried in those close, and smooth passages, like as in so many pipes, or trunks, finding no issue out reflects upon it selfe, and causes a confused noise, and circulation of the aire, which by degrees vanishes as the motion of it ceases.

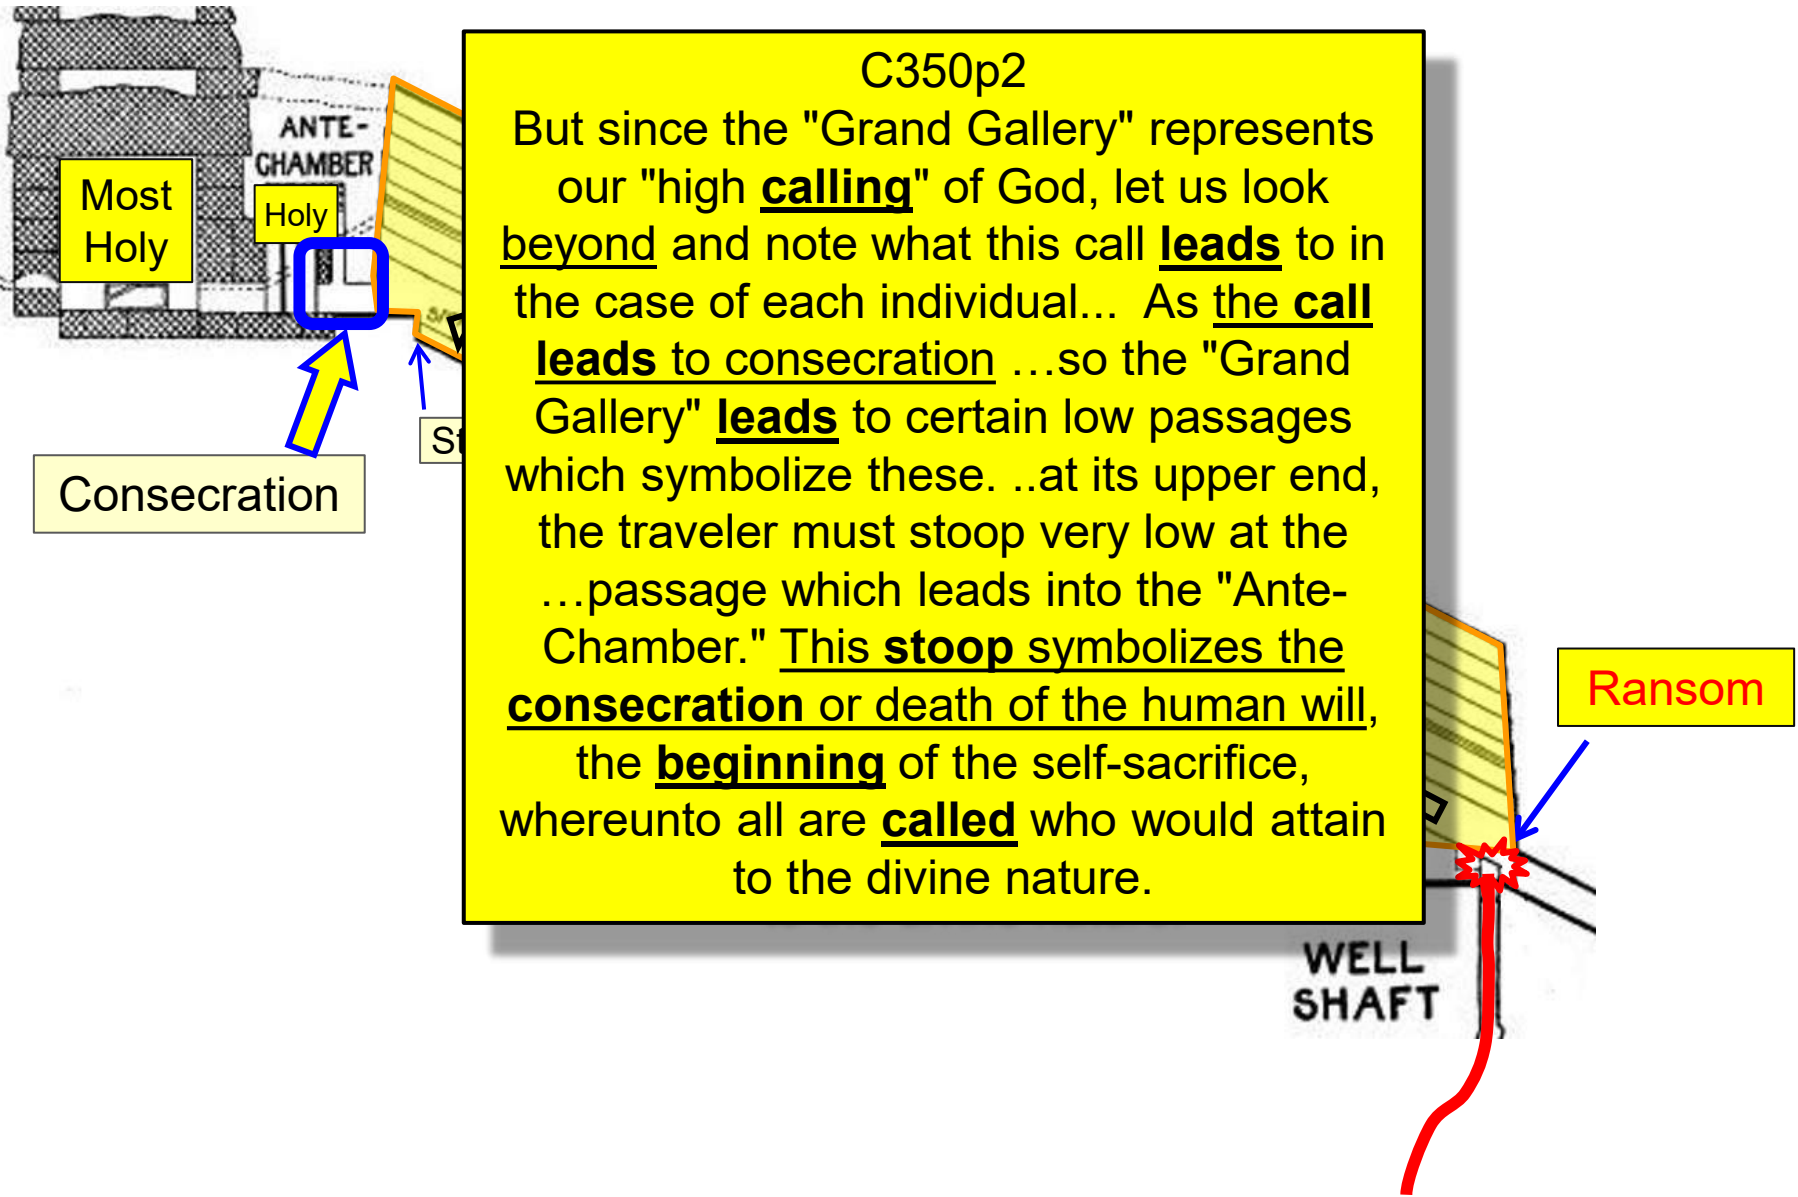

This Gallery, or *Corridore* (or whatsoever else I may call it) is built of white, and polished marble, the which is very evenly cut in spacious squares, or tables. Of such materials as is the pavement, such is the rooffe, and such are the side walls, that flank it: the coagmentation, or knitting of the joints, is so close, that they are scarce discernable by a curious eye, & that which adds a grace to the whole structure, though it makes the passage the more slippery, & difficult, is the acclivity, & rising of the ascent. The height of this Gallery is 26 feet, the breadth is 6 feet, and 870 parts of the foot divided into a 1000. of which three feet, and 435 of 1000 parts of a foot, are to be allowed for the way, in the midst: which is set, and bounded on both sides with two banks (like benches) of sleek and polished stone; each of these hath one foot, 717 of 1000 parts of a foot in breadth, and as much in depth. # The Gold Pyramidion

M. Verner and Z. Hawass [11] found a relief in the pyramid complex of Sahure showing the hauling of a pyramidion on a horizontal surface. The text written on the block mentions, that the pyramidion was plated with gold. Unfortunately the pyramidion itself is not shown on the block that was found but must have been depicted on a following block which hasn't yet been found.

Newly Discovered Blocks from The Causeway of Sahure, MDAIK 52 1996 (mit M. Verner)

## Pyramidion according to antique historians:

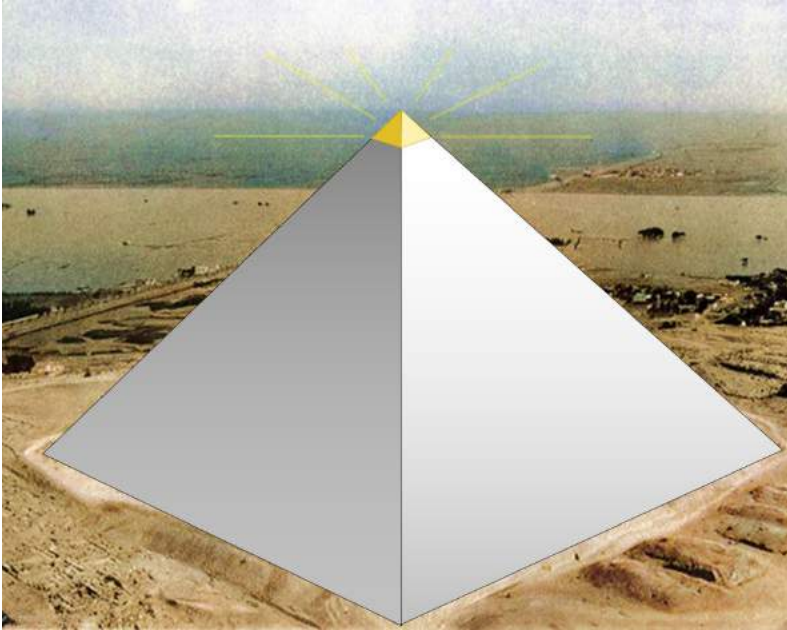

According to Agatharchides of Cnidus [9] an antique Greek historian (208 B.C.) the pyramidion of the Great Pyramid was four cubits high and made from a glittering metal, probably gold.

[9] Agatharchides of Knidos Asiatica

## Pyramidion of Khufu's pyramid:

The pyramidion of Khufu's pyramid is missing - the last 9 stone courses (or more) have been removed, the pyramidion was probably toppled and hasn't been found. The pyramidion of a large pyramid such as the pyramid of Khufu weighted around 5 to 6 tons, was made from Tura limestone, granite or diorite and was perhaps gold plated [2].

# The Step: Counting the Cost

GPP-V1-Pg112-Par187: The Step symbolizes the natural dislike of the human mind to entertain earnestly and sincerely the thought of self-denial and self-sacrifice, for "no man ever yet hated his own flesh" Eph. 5:29 With the help of the grace of God, however, some are enabled by an effort to surmount this difficulty. When they do so, they find that more than half the battle of decision has been won.

GPP-V1-Pg72-Par106: Those, therefore, who reach the top of the Step at the head of the Grand Gallery, and pass through the low horizontal passages to the King's Chamber, are comparatively a very small and select company, indeed !'
